PROFESSIONAL SUMMARY

Full Stack Developer with 1+ year of production experience building and shipping real-world web applications. Proficient in both frontend and backend development, with additional expertise in AI/ML integrations, real-time systems, and end-to-end deployment of scalable applications.

TECHNICAL SKILLS

Frontend:	React.js, Next.js, JavaScript (ES6+), HTML5, CSS3, Tailwind CSS, Bootstrap, ReactBootstrap, Framer Motion, Responsive Design
Backend:	Node.js, Express.js, Python, REST API Design, WebSockets, Socket.io, JWT Authentication, Bcrypt, Middleware Design
Python & AI/ML:	Python, TensorFlow, PyTorch, Model Training & Fine-Tuning, Data Preprocessing
AI / RAG:	RAG Pipeline Design, Ollama (Local LLM), LangChain
Databases:	MongoDB, Mongoose ODM, MySQL, PostgreSQL, Database Schema Design, Query Optimization, Vector Databases
Real-Time:	Socket.io, WebSocket Protocol, Event-Driven Architecture, Room & Namespace Management, Broadcast & Emit Patterns
Dev Tools:	Git, GitHub, VS Code, Postman, npm/yarn, Chrome DevTools, Jupyter Notebook
Deployment:	Firebase Hosting, Firebase Authentication, Vercel, Render, Environment Config, CORS Setup
Concepts:	MVC Architecture, System Design, CRUD Operations, SPA Development, Component-Based UI, State Management, Third-Party API Integration (Zoom), SDLC

WORK EXPERIENCE

Jaisvik Software (P) Limited — Full Stack Developer	2024 – Present
- Architected and delivered 2+ full-stack production applications using React.js, Node.js + Express.js, and MongoDB — all deployed and running live. - Designed and built secure RESTful APIs with JWT-based authentication, role-based access control (RBAC), input validation, and bcrypt password hashing. - Developed a WhatsApp-style real-time chat application using Socket.io — featuring live messaging, typing indicators, online/offline status, read receipts, group rooms, and persistent message history in MongoDB. - Engineered an AI-powered chatbot using RAG architecture — ingests knowledge base documents, performs vector-based retrieval, generates context-aware responses via LLM API, and escalates unresolved queries to live support. - Modeled and optimized MongoDB schemas with Mongoose including indexing, population, and aggregation pipelines for performant data retrieval across relational-style data structures. - Integrated multiple third-party APIs (payment gateways, KYC verification, crypto data feeds) and handled async flows with proper error handling and retry logic. - Improved frontend performance using React lazy loading, code splitting, memoization (useMemo/useCallback), and optimized re-render cycles for smooth UX on low-end devices. - Handled full deployment pipeline — deployed projects on Firebase Hosting and configured Firebase Authentication for secure login flows.	

PROJECTS

Jaimax Community Hub (Chat App)
<i>Node.js · Socket.io · React.js · MongoDB · JWT · Express.js</i>
- Built a full-featured real-time chat app with live messaging, typing indicators, online/offline status, read receipts, and group rooms using Socket.io room-based architecture. - Persisted message history in MongoDB and secured all socket connections and API routes with JWT middleware.
Jaisvik Software (P) Limited — Company Website

React.js · Node.js · Express.js · MongoDB · Tailwind CSS · Framer Motion

- Built the full company website end-to-end — animated landing pages, service showcase, and a custom backend quotation engine that generates structured business quotes from user requirements.
- Implemented JWT-secured auth with bcrypt, protected admin routes, and deployed to production with environment-based configuration.

Jaimax Coin — Crypto platform

React.js · React-Bootstrap · Node.js · Tailwind CSS · RAG Chatbot · Third-party APIs

- Designed the full frontend including crypto dashboard, portfolio tracker, KYC flow, and exchange interface with coin purchase and crypto-to-crypto exchange functionality.
- Integrated a RAG-based AI chatbot that retrieves answers from a knowledge base and escalates unresolved queries to live support agents in real time.

MentorConnect — Mentee & Mentor Platform

React.js · Node.js · Express.js · MongoDB · Firebase · Zoom API · JWT

- Sole developer — built the full platform with three dashboards (Mentee, Mentor, Admin), Zoom OAuth integration for auto-generated meeting links, and a booking engine with conflict detection.
- Implemented Firebase Authentication and designed MongoDB schema for users, availability, bookings, and sessions with proper indexing and population.

Enterprise AI Chatbot — Secure RAG System with Ollama

Python · Ollama · LangChain · Vector DB · Node.js · Express.js

- Built a full RAG pipeline — document ingestion, chunking, vector embedding, cosine similarity retrieval, and local LLM inference via Ollama, keeping enterprise data entirely on-premise.
- Benchmarked multiple LLM models, tuned chunk size and prompt templates to reduce hallucinations, and added hybrid escalation to route low-confidence queries to a live agent.

EDUCATION

Sri Indu College of Engineering and Technology, Hyderabad

2021 – 2024

B.Tech — Mechanical Engineering | CGPA: 7.5 / 10
